IL4 (N) Antibody, Rabbit Polyclonal

Cat#: R0071-1

Quantity: 100 ug

Predicted M.W.: 17 kDa

Lot#: Refer to vial

Application: WB, ELISA

Uniprot ID: P05112

Background:

Interleukin 4 (IL4) is a pleiotropic cytokine produced by activated T cells. It participates in several B-cell activation processes as well as of other cell types. It induces the expression of class II MHC molecules on resting B-cells. IL4 is the ligand for interleukin 4 receptor which can also bind IL13. IL4 is a costimulator of DNA-synthesis. It enhances secretion and cell surface expression of IgE and IgG1.

Other Names:

BCGF-1, BCGF1, BSF1, IL-4, MGC79402

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the N-terminal region of human IL4. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human

Tested Applications:

WB: 1:1,000-1:5,000 (detect endogenous protein*)

ELISA: 1:1,000- 1:10,000 (detect native recombinant protein in a direct ELISA assay). Suitable for using as ELISA capture or detection antibody.

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of recombinant human IL-4 protein (A: 10ng, B: 60 ng), using Ab (R0071-1) at RT for 2 h.
