BMP8A (N) Antibody, Rabbit Polyclonal

Cat#: R0248-1

Quantity: 100 ul

Predicted M.W.: 45 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: P34821

Background:

Bone morphogenetic protein 8A (BMP8A) belongs to the TGF-beta family, which induces cartilage and bone formation. BMP8A may be the osteoinductive factor responsible for the phenomenon of epithelial osteogenesis. BMP8A also plays a role in calcium regulation and bone homeostasis.

Other Names:

Bone morphogenetic protein 8A, BMP-8A, Osteogenic protein 2, OP-2, BMP8, BMP-8

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the N-terminal region of mouse BMP8A. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:5,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from (A) human A549, (B) mouse brain, using Ab (R0248-1) at RT for 2 h.
