NAB1 (C1) Antibody, Rabbit Polyclonal

Cat#: R0786-2

Quantity: 100 ul

Predicted M.W.: 54 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: Q13506

Background:

NGFI-A-binding protein 1 (NAB1) is a nuclear protein that belongs to the NAB family. NAB1 acts as a transcriptional repressor for zinc finger transcription factors EGR1 and EGR2. Homomultimer of NAB1 may interact with EGR1 bound to DNA and mediate transcriptional repression.

Other Names:

NGFI-A-binding protein 1, EGR-1-binding protein 1, Transcriptional regulatory protein p54

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of human NAB1. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human

Tested Applications:

WB: 1:500-1:1,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from human HeLa, using Ab (R0786-2) at RT for 2 h.
