ZNF185 (M) Antibody, Rabbit Polyclonal

Cat#: R1153-2

Quantity: 100 ul

Predicted | Observed MW: 74 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: O15231

Background:

Zinc finger protein 185 (ZNF185) may function as a tumor-suppressor protein by associating with the actin-cytoskeleton. Zinc-finger proteins bind nucleic acids and play important roles in various cellular functions, including cell proliferation, differentiation, and apoptosis. ZNF185 encodes a LIM-domain zinc finger protein. The LIM domain is composed of two contiguous zinc finger domains, separated by a two-amino acid residue hydrophobic linker. The LIM domain mediates protein:protein interactions.

Other Names:

Zinc finger protein 185, LIM domain protein ZNF185, P1-A

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the middle region of human ZNF185. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human

Tested Applications:

WB: 1:500-1:1,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from human HeLa, using Ab (R1153-2) at RT for 2 h.
