## **KDM1A (N2) Antibody, Rabbit Polyclonal**

**Cat#: R0232-1**

**Quantity: 100 ul**

**Predicted M.W.: 93 kDa**

**Lot#: Refer to vial**

**Application: WB**

**Uniprot ID: O60341**

### **Background:**

Lysine-specific histone demethylase 1A (KDM1A) is a histone demethylase that demethylates both 'Lys-4' (H3K4me) and 'Lys-9' (H3K9me) of histone H3, thereby acting as a coactivator or a corepressor, depending on the context. KDM1A acts as a corepressor by mediating demethylation of H3K4me, a specific tag for epigenetic transcriptional activation. KDM1A can demethylate both mono- (H3K4me1) and di-methylated (H3K4me2) H3K4me, and may play a role in the repression of neuronal genes. KDM1A also acts as a coactivator of androgen receptor (ANDR)-dependent transcription, by being recruited to ANDR target genes and mediating demethylation of H3K9me, a specific tag for epigenetic transcriptional repression. KDM1A is required for gastrulation during embryogenesis.

### **Other Names:**

Lysine-specific histone demethylase 1A, BRAF35-HDAC complex protein BHC110, Flavin-containing amine oxidase domain-containing protein 2, AOF2, KDM1, KIAA0601, LSD1

### **Source and Purity:**

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the N-terminal region of human KDM1A. Antibodies were purified by affinity purification using immunogen.

### **Storage Buffer and Condition:**

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN<sub>3</sub>. Store at -20 °C. Stable for 6 months from date of receipt.

### **Species Specificity:**

Human

### **Tested Applications:**

WB: 1:1,000-1:5,000 (detect endogenous protein\*)

\*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

**Product Data:**

**Fig 1.** Western blot of total cell extracts from human HeLa, using Ab (R0232-1) at RT for 2 h. The observed M.W. of KDM1A is approximately 110 kD.
