HSP90AA1 (C) Antibody, Rabbit Polyclonal

Cat#: R0515-5

Quantity: 100 ul

Predicted | Observed MW: 85 | 90 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: P07900

Background:

Heat shock protein HSP 90-alpha (HSP90AA1) is a molecular chaperone that promotes the maturation, structural maintenance and proper regulation of specific target proteins involved in cell cycle control and signal transduction. HSP90AA1 undergoes a functional cycle that is linked to its ATPase activity. This cycle probably induces conformational changes in the target proteins, thereby causing their activation. HSP90AA1 interacts dynamically with various co-chaperones that modulate its substrate recognition, ATPase cycle and chaperone function.

Other Names:

Heat shock protein HSP 90-alpha, Heat shock 86 kDa, HSP 86, Renal carcinoma antigen NY-REN-38, HSP90A, HSPC1, HSPCA

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of human HSP90AA1. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:3,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from (A,H) mouse brain, (B,I) mouse spleen, (C,J) mouse liver, (D,K) human HeLa, (E,L) human Jurkat, (F,M) human H1299; using 2 independent Abs against 2 distinct regions of human HSP90AA1 at RT for 2 h.
