TNFRSF1A (N3) Antibody, Rabbit Polyclonal

Cat#: R1682-5

Quantity: 100 ul

Predicted | Observed M.W.: 50 | 58 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: P19438

Background:

TNFRSF1A is the receptor for TNFSF2/TNF-alpha and homotrimeric TNFSF1/lymphotoxin-alpha. TNFRSF1A is activated by the adapter molecule FADD recruiting caspase-8. Defects in TNFRSF1A are the cause of familial Hibernian fever, also known as tumor necrosis factor receptor-associated periodic syndrome.

Other Names:

TNFAR, TNFR1

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the N-terminal region of human TNFRSF1A. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:3,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from (A, D) mouse brain, (B, F) human HeLa, (C, G) human MDA-MB231, (E) mouse thymus; using 2 independent Abs against 2 distinct regions of human or mouse TNFRSF1A at RT for 2 h.
