FSCN2 (C) Antibody, Rabbit Polyclonal

Cat#: R2832-2

Quantity: 100 ul

Predicted | Observed M.W.: 55 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: O14926

Background:

Fascin-2 (FSCN2) is a member of the fascin protein family. Fascins crosslink actin into filamentous bundles within dynamic cell extensions. FSCN2 is proposed to play a role in photoreceptor disk morphogenesis. A mutation in the FSCN2 gene results in one form of autosomal dominant retinitis pigmentosa and macular degeneration [provided by RefSeq].

Other Names:

Fascin-2, Retinal fascin, RFSN, RP30

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of human FSCN2. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:3,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from A) mouse thymus, B) human HeLa, C) human Jurkat; using anti-FSCN2 (C) (R2832-2) at RT for 2 h.
