PBRM1 (C) Antibody, Rabbit Polyclonal

Cat#: R0429-4 Lot#: Refer to vial

Quantity: 100 ul Application: WB

Predicted I Observed M.W.: 193 kDa Uniprot ID: Q86U86

Background:

Protein polybromo-1 is a subunit of ATP-dependent chromatin-remodeling complexes. PBRM1 has been identified as in integral component of complexes necessary for ligand-dependent transcriptional activation by nuclear hormone receptors. Mutations at this locus have been associated with primary clear cell renal cell carcinoma.

Other Names:

BAF180, PB1, hPB1, Protein polybromo-1, Protein polybromo-1, Protein polybromo-1

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of human PBRM1. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:3,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.
