## **WNT11 (C) Antibody, Rabbit Polyclonal**

**Cat#: R0392-2**

**Quantity: 100 ul**

**Predicted | Observed M.W.: 39 kDa**

**Lot#: Refer to vial**

**Application: WB**

**Uniprot ID: P48615**

### **Background:**

The WNT gene family consists of structurally related genes which encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. WNT11 is a member of the WNT gene family, and it may play roles in the development of skeleton, kidney and lung, and is considered to be a plausible candidate gene for High Bone Mass Syndrome.

### **Other Names:**

None

### **Source and Purity:**

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of mouse WNT11. Antibodies were purified by affinity purification using immunogen.

### **Storage Buffer and Condition:**

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN<sub>3</sub>. Store at -20 °C. Stable for 6 months from date of receipt.

### **Species Specificity:**

Human, Mouse

### **Tested Applications:**

WB: 1:1,000-1:3,000 (detect endogenous protein\*)

\*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

**Product Data:**

**Fig 1.** Western blot of total cell extracts from A) human HeLa, B) human Jurkat; using anti-WNT11 (C) (R0392-2) at RT for 2 h.
