NCKAP5 (N) Antibody, Rabbit Polyclonal

Cat#: R1953-1

Quantity: 100 ul

Predicted | Observed M.W.: 209 | 250 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: O14513

Background:

Nck-associated protein 5 (NCKAP5) interacts with the SH3-containing region of the adapter protein Nck, which associates with tyrosine-phosphorylated growth factor receptors or their cellular substrates. NCKAP5 is expressed in fetal and adult brain, leukocytes and fetal fibroblasts. Diseases associated with NCKAP5 include hypersomnia, and iron deficiency anemia.

Other Names:

Nck-associated protein 5, NAP-5, Peripheral clock protein, ERIH, ERIH1, ERIH2

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the N-terminal region of human NCKAP5. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:3,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from mouse brain, using anti-NCKAP5 (N) (R1953-1) at RT for 2 h.
