Guaranteed Antibody Production Service

Cat#: CSR-G003

The "Guaranteed Rabbit Polyclonal Antibody Production" service is performed based on the following conditions:

- 1.** Customer will provide the sequence information (e.g. name or ID number) of target protein(s).
 - 2.** Abiocode will design and produce a specific antigen for immunization using a proprietary technology developed at Abiocode, a process that will take about 3 weeks.
 - 3.** Two Rabbits will be immunized by the following protocol:
 - Day -1: Obtain pre-immune serum (0.5 to 1 ml)
 - Day 0: Immunization (two rabbits/antigen)
 - Day 21: 1st boost
 - Day 35: 2nd boost
 - Day 49: 3rd boost
 - Day 59: Production bleed #1 (5 - 10 ml antiserum)
 - Day 63: 4th boost
 - Day 73: Production bleed #2 (5 - 10 ml antiserum)
 - Day 77: 5th boost
 - Day 87: Production bleed #3 (5 - 10 ml antiserum)
 - Day 91: Terminal bleed (20 - 30 ml antiserum)
 - 4.** A small sample of antisera (50 ul/rabbit) and affinity-purified antibodies from the corresponding antisera (30 ul/rabbit) will be sent to the customer for testing.
 - 5.** Upon the customer's satisfaction, 35 to 60 ml of antiserum will be provided. The customer has the option to purchase our affinity-antibody purification service.
-

**For research use only. Not for therapeutic or diagnostic purposes.
